Integrated Real-Time Active Data

*To have that information at my
fingertips is crucial to patient
safety* - GP participating in iRAD

iRAD is an initiative of
South Western Sydney PHN

An Australian Government Initiative

**Instant access to patient
information for
better clinical outcomes**

Innovative. Trusted. Secure

*iRAD is supported by funding from the Australian
Government through the PHN Program.*

What is iRAD?

iRAD (Integrated Real-Time Active Data) is innovative new software for clinicians.

It enables critical patient data to be shared between hospitals, GPs and other healthcare providers.

iRAD captures patient information entered into clinical software and exchanges it seamlessly across the healthcare continuum, including data within My Health Record.

Clinicians can save time, improve quality of care and make better clinical decisions by accessing accurate patient data in real-time.

Why use iRAD?

Better health outcomes

- Enhanced patient information for better clinical decisions.
- Improved patient safety - no longer relying on patients re-telling their story.
- Potential for clinical and medication errors is greatly reduced.
- Easier coordination of care.

Practical and easy-to-use

- Connects with Best Practice, Medical Director, My Health Record and other data sources.
- Quick and easy to record patient consent. Can be recorded by reception, nurse or GP.
- No cost to GP or patient.
- Single sign-on, no additional logins.

Who does iRAD help?

- 💡 patients who access multiple health services
- 💡 patients with low health literacy or who struggle to recall clinical history
- 💡 patients who speak English as a second language
- 💡 patients attending After Hours services
- 💡 patients with complex chronic conditions

iRAD FAQs

Are there risks associated with iRAD?

iRAD uses military grade security. All access is tracked and secured to individual user accounts to ensure trust and traceability. iRAD fully complies with Australian healthcare legislation.

Is all clinical data shared?

Clinical data marked as confidential is NOT shared with other health providers.

Will clinical data be used in research?

Private data will NOT be used in identified research. De-identified data may be used to help develop population health strategies.

Does participating in iRAD create extra work for my practice?

iRAD saves you time with instant access to up-to-date patient data, less time spent on administrative processes and no ongoing effort required to maintain data shared (automated based on patient consent).

How can I encourage patients to join?

Consent is opt-in. Patient-friendly resources are available to help explain iRAD to your patients.
