# Identifying a practice's Allergy status record. Then narrowing it down to only Dr Strange's patients
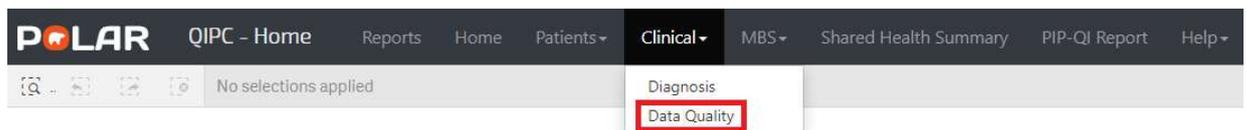

Patient cohort:

All patients who:

- Have never had their allergy status recorded
- Regular GP is Dr Strange

1. Log in to POLAR > Click **Reports** > Click **QIPC Clinic**

2. Select **Clinical** (arrow down) from the top grey bar, then **Data Quality** from the dropdown box

3. Here the practice has 94.9% of their patients with an Allergy status recorded.
(This number would be used in the MFI as the practice's **baseline data**).
To see the exact number of patients who need to have their allergy status updated:
Select **"Click to select Patients missing"** (in blue) - across from **Allergies**

Quality Recorded

Quality Item ▲	Age Criteria	Clinic Recorded	PHN Recorded	
Smoking*	10	78.7%	63.7%	Click to select Patients missing
Alcohol*	15	49.6%	33.2%	Click to select Patients missing
Allergies	All	94.9%	80.2%	Click to select Patients missing
BMI*	18	43.1%	23.5%	Click to select Patients missing
Physical Activity	All	0.4%	0.3%	Click to select Patients missing
Waist Circumference*	18	9.2%	5.1%	Click to select Patients missing
Blood Pressure*	18	68.2%	48.1%	Click to select Patients missing
Indigenous Status	All	82.5%	70.3%	Click to select Patients missing
Ethnicity	All	65.7%	49.9%	Click to select Patients missing
Social History	All	59.4%	49.5%	Click to select Patients missing
Next of Kin	All	79.1%	64.3%	Click to select Patients missing
Gender	All	100.0%	98.7%	Click to select Patients missing
Family History	All	40.8%	34.9%	Click to select Patients missing
Emergency Contact	All	66.8%	52.1%	Click to select Patients missing

The report will be updated with only the patients without their Allergy status recorded (100% - 94.9% = 5.1% into a number = 247 patients that need their Allergy status updated. (Note how Allergy status is now at 0%)

The data quality dashboard below follows a 'traffic light' colour system to indicate performance against RACGP Accreditation Standards; 90% of patients with allergies recorded and 75% for the remaining clinical and demographic summary items.

Green indicates meeting the RACGP standard, orange indicates within 20% while red indicates more that 20% from the RACGP standard

4. If you wish to further break this down to a certain GP's patients:
Click **Most seen Clinician** > Select **Dr Strange** from dropdown box

- So, Dr Strange has 12 patients who need their patient status updated

5. To see the names of these patients > Click **Patient List** (in the top right-hand corner)

6. Then in the following page Click **"Export to Excel"** to download Patient List (in the top left-hand corner)

PATIENT LIST
