

Medical Director – Pathology

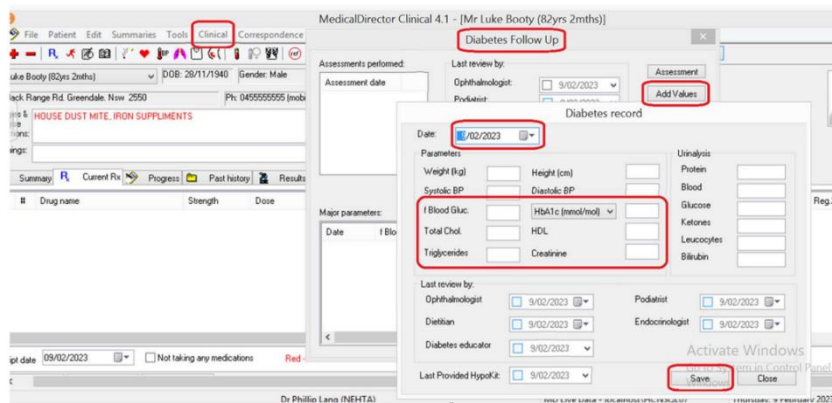

Manually updating pathology

There are two (2) options to add pathology results to a patient’s Medical Director file:

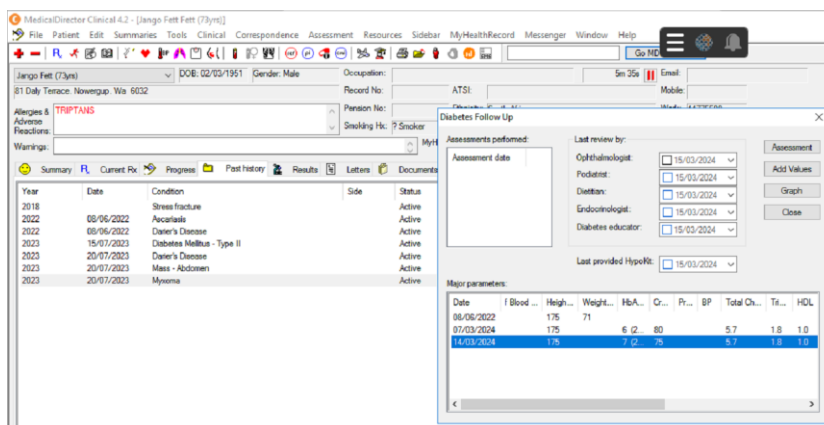

Option 1: via Diabetes Follow Up box

In the patient file go to **Clinical** in the menu bar, click **Diabetes Record**

In the **Diabetes Follow Up** box click **Add Values**, Input pathology values, including **Date**, then **Save**.

Pathology results will now appear in the **Major parameters** box in the **Diabetes Follow Up** box.

NOTE: If the patient has an active diabetes diagnosis, results will be shown on the POLAR QIPC Diabetes Management page. POLAR may not be able to pick up all manually added pathology. We recommend contacting the pathology provider to ask for pathology to be transmitted in HL7 format.

Option 2: via Results

1. Open patient file, click on the **Results** tab, then select **Add**.

2. Enter the required details:
Subject, date requested, and date collected.
Type result in **Result** box.
Add **Action** or **Recall** as required. Then **Save**.

A screenshot of the 'Add Investigation Result' form. The form contains the following fields and values:

- Start Patient: ANDREWS, Julie
- 5 Jefferson St, Bundaberg 4670
- Birthdate: 3/03/1936 Age: 87yrs Gender: F
- Your Reference: 17
- Subject: Active B12
- Date Requested: Tuesday, 5 September 2023
- Date Collected: Monday, 11 September 2023
- Result: Active B12: 31 pmol/L

At the bottom of the form, there are buttons for 'Action', 'Add Recall', 'Save', and 'Cancel'. The 'Add Investigation Result' title and the 'Subject', 'Date Requested', and 'Date Collected' fields are highlighted with red boxes.

3. Results will now be saved and displayed under **Results** tab

A screenshot of the patient file interface showing the 'Results' tab. The table below shows the results:

Requested	Subject	Comment	Date Checked	Checked By	Notation	Date Notified
123	VITAMIN D (25.OH)		8/08/2023	DR PHILLIP LANG	Discuss	
123	ACTIVE B12		8/08/2023	DR PHILLIP LANG	Discuss	

The 'Results' tab is highlighted with a red box. The row for 'ACTIVE B12' is highlighted in blue.

NOTE: POLAR may not be able to pick up all manually added pathology. We recommend contacting the pathology provider to ask for pathology to be transmitted in HL7 format.
