

POLAR Walkthrough

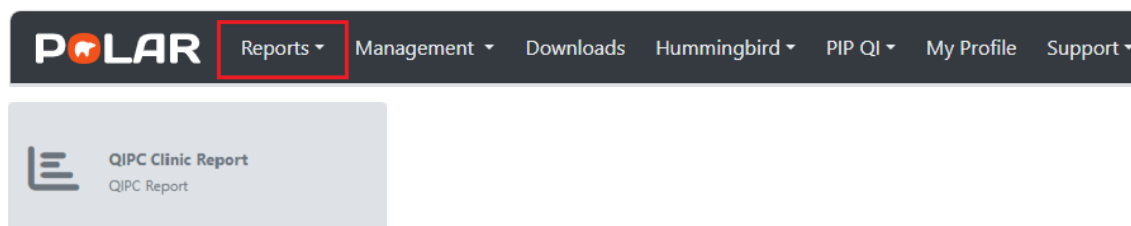

QIPC – patients with cardiovascular disease with hypertension with no eGFR result recorded in the last 12 months

Patient Cohort:

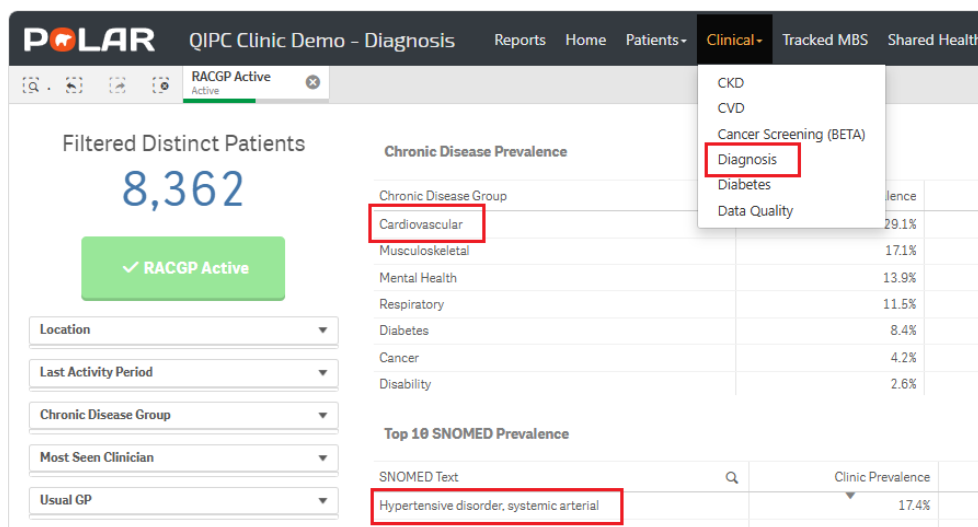

- Practice Active & RACGP Active (visit practice at least 3 times in 2 years)
- Active cardiovascular disease (CVD) with hypertension (Step 2)
- No eGFR recorded in last 12 months (Step 3)

Note: Patient cohort can be modified by adding or removing steps according to the needs of your practice.

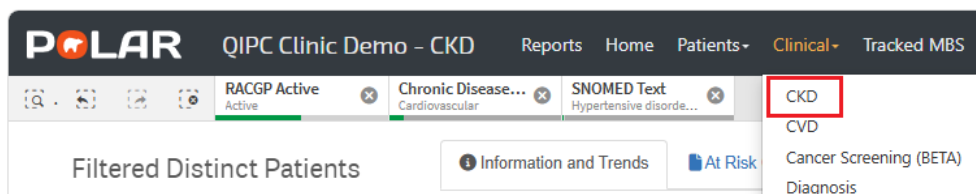

1. Log in to **POLAR** polarexplorer.org.au > click **Reports** > click **QIPC Clinic Report**

2. Click **Clinical > Diagnosis**
on the **Chronic Disease Group** table > select **Cardiovascular** then ✓
on the **Top 10 SNOMED Prevalence** table > select **Hypertensive disorder, systemic arterial** then ✓

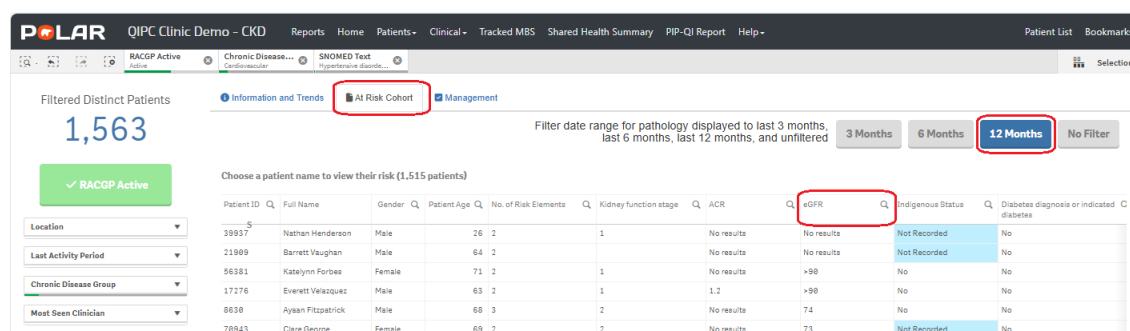

- Click **Clinical** then select **CKD**

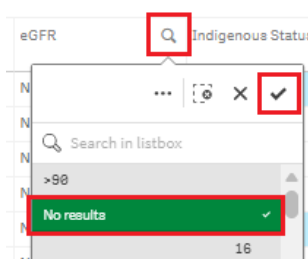

- Select **At Risk Cohort**

Select date range **12 months** (NOTE: select date range before any further filters)

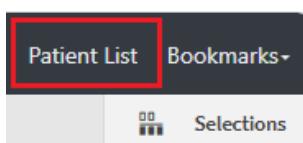

Note: patients with active CKD diagnosis will be excluded.

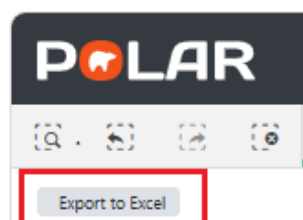

- On the table, click on the **magnifying glass** next to **eGFR**. In the Search box select **No results**, then tick ✓

- When all required filters are applied, click on **Patient List** on the top right-hand side of the screen

- Click on **Export to Excel** to download the patient list as an Excel file on your computer
